Software Developer | Laravel, Livewire, PHP, TypeScript | New product work and legacy refactoring

Software developer on a large PHP SaaS platform used by US local governments. I build features across a new Laravel and Livewire site builder and the main legacy PHP platform. Before that, two years of code-level support: tracing bugs through C#, Python, and SQL for a collections software suite.

EXPERIENCE

Software Developer Sept 2025 to Present

iWorQ Systems, Logan, UT

- Build a large share of SmartXEO, a new Laravel and Livewire CMS and site builder for small towns, working across the whole product. SmartXEO also offers an AI-powered search bar that towns can embed in their existing websites.
- Helped introduce Livewire to the team for SmartXEO's interactive interface.
- Build features and fix bugs across the modules of a large legacy PHP platform for permits, licensing, and code enforcement.
- Scope features with Product, track down bugs with QA and Support, and maintain public-facing Laravel portals and forms.
- Use locally hosted AI coding agents every day for implementation, refactoring, and debugging.

Software Support Specialist June 2023 to Sept 2025

DAKCS Software Systems and PDCflow, Ogden, UT (remote)

- Provided remote technical support for a legacy collections software suite, resolving 30+ tickets a week by tracing bugs through IMS BASIC, C#, and Python code and finding bad data with SQL.
- Wrote troubleshooting guides for recurring issues and led remote training sessions for new and existing customers.

SKILLS

Languages and frameworks: PHP, Laravel, Livewire, TypeScript, JavaScript, Python, SQL, PostgreSQL, HTML and CSS, React

Tools: Git, Linux, Docker, AI coding agents

EDUCATION

B.S. Computer Science, Utah State University, May 2024. GPA 3.96, Summa Cum Laude.

Relevant courses: Developing Web Applications, Modern Web Development, Intro to Software Engineering, Intro to Database Systems, Advanced Algorithms, Mobile Application Development.

Hackathons: Best Video Game, USU Game Jam 2025 (Bubble Defender, team of 2). 2nd place, game development, HackUSU 2025 (SaboTanks, team of 4).
