

Caden Harris

Logan, UT / contact@caden.work / (435) 232-5603

Education

Computer Science

Utah State University
05/2024

- Graduated with Bachelor's Degree — 3.9+ GPA
 - Relevant Courses: Web Development, Advanced Algorithms, Mobile Application Development, Decision Making Under Uncertainty, Software Engineering, Programming Languages, Advanced Databases, Data Science
-

Experience

DAKCS Software Systems and PDCflow

Software Support Specialist, Ogden, UT
06/2023 - Present

- Resolved an average of 30+ weekly software support tickets by diagnosing issues with C#, IMS BASIC, and Python, analyzing database inconsistencies using SQL, and promoting solutions using object-oriented programming.
 - Improved team efficiency by authoring comprehensive documentation on troubleshooting common software issues.
 - Enhanced customer satisfaction by leading remote training sessions for new and existing users on software features and best practices.
-

Skills

Git, TypeScript, JavaScript, Python, HTML, CSS, Java, C#, Kotlin, Dart, Flutter, SQL, Linux, React.js, Express.js, Vue.js, SolidJS, Django, Astro, Firebase, AWS, MongoDB, SQLite, REST, Adobe Creative Suite

Projects Portfolio // caden.work

[Recipe Sharing Website](#) - Developer

- Engineered a data processing pipeline using Google Cloud Vision for OCR and OpenAI's GPT-3.5 API to automatically parse, normalize, and categorize text from user-uploaded recipe photos.
- Designed a modern, intuitive React.js web application using Tailwind CSS that engages users with their recipes while allowing for robust customization.

[Galaga TypeScript Recreation](#) - Developer

- Implemented dynamic game logic using TypeScript, leveraging React for smooth rendering and efficient state management of player and enemy objects.
- Developed game mechanics based off of the original Galaga arcade game.
- Designed and optimized collision detection algorithms to register enemy hits and player interactions, enhancing gameplay experience.

[Fitness Tracking Android App](#) - Creator

- Developed a native Android application using Kotlin and Jetpack Compose to allow users to track workout routines and monitor progress.

[Frappuccino Store Software](#) - Team Member
